

Mactech Europe LTD

Magbase Drilling Machine

MD50 & MDS50 Twin Rail Slide System

This perfected innovative design is the result of conscious and consistent research and development with built-in safety features as standard on all machines. Mactech Europe machines are built to the highest standard with High-Tech electro-magnetic bases, the most powerful motor units made in Germany which have been specially adapted for our needs plus PCB Control boards with built in interlinked safety features unique to these machines.

Advantages over other brand Machines using Dovetail Systems

- T.R.S.S. Maximises slide stability.
- Upto 10 times better stability than dovetail systems.
- Slide has no contact with main body of machine.
- Reduced friction less wear.
- Low maintenance better reliability
- Reduced cutter breakages due to better slide stability.
- Improved cutter life.
- Better tolerance achievable.
- Improved hole quality.
- Upto 110mm cutting depth with cutters with small machine.
