

Mactech Europe LTD Ground

Millhog Electric

End Prep .500-2.250in (12.7-57.2mm)

Membrane Removal .875in-1.250in

The Electric Powered Ground Millhog offers the convenience of plug in power and is available in 110v or 220v. It's only 1-1/2" wide and can bevel any angle of end prep on tube or pipe.

The Ground MILLHOG® Electric Powered Bevelling tool offers all the same benefits as the pneumatic version with the added ease of being using a electric power outlet.

It is ideal for end prepping tubes and pipe during boiler outages and can end prep alloys. The critical width dimension is only 1.500in wide for accessing single tubes in a boiler tube waterwall and it can be equipped with a Membrane Removal Head for removing membrane from boiler tubes from .875in o.d. to 1.250in o.d.

Key Features

- **Compact low maintenance end prep tool**
- **Patented push-pull clamping and release system**
- **Rigidly mounts to tube i.d., easy to release**
- **Self-centering torque free operation**
- **Permanently attached clamps and wrenches**
- **Sealed construction allows use in any orientation**
- **Produces a smooth continuous chip**
- **Performs any angle of bevel**
- **Steel housing with integral radial-thrust ball bearing**
- **Chatter free blade locking system**
