

Mactech Europe LTD

Mongoose Millhog Electric

The Mongoose Electric Powered Tube and Pipe Beveling Tool has a powerful 950 watt motor available in 110 or 220 volt. The convenience of plugging it into an electric outlet make it ideal when air is not available.-Bevels, faces and bores stainless steel and other highly alloyed tubing.

The Electric Powered Mongoose is ideal for end prepping all boiler tube materials. It's only 2.250in wide for accessing single tubes in a boiler tube waterwall and can be equipped with a Membrane Removal Head for removing membrane from boiler tubes.

Key Features

- Patented, self-centering, push-pull clamp and release mechanism has permanently attached wrenches.
- Only 2-1/4" wide.
- Rugged with torque-free operation.
- Powerful pneumatic motor needs only 25 cfm air flow.
- Produces a thick chip without cutting oils.
- Easy-to-change mandres.
- EscoLock blade locking system.
