Mactech Mongoose EPL

Right Angle ID Clamping End Prep Tool
5/8" (15.9mm) ID to 3" (76.2mm) OD

Rugged, Fast, and Field-Proven

The Mactech Mongoose EPL is a lightweight, small diameter, end prep tool for beveling tubes from 5/8" ID to 3" OD. Featuring a patented push-pull clamp and release mechanism and permanently attached wrenches, it allows the clamps to release from a tube as easily as they tighten. Ideal for performing bevel facing and boring on a wide range of tube and pipe alloys, the Mactech Mongoose EPL has dual opposed tapered roller bearings and employs a rigid blade locking system to provide chatter-free performance and produce a thick chip without cutting fluids.

- Bevels, faces and bores stainless steel and other highly alloyed tubing
- Patented, self-centering, push-pull clamp and release mechanism has permanently attached wrenches
- Only 2-1/4" wide
- Rugged with torque-free operation
- Produces a thick chip without cutting oils
- Easy-to-change mandrels

An optional air-clamp cylinder decreases the cycle time between end preps by up to 400% and is ideal for fabricating shops
