

Ground MILLHOG®

Right Angle I.D. Clamping
Tube and Pipe Beveling Tool
0.5" I.D. to 2.25" O.D.
12.7 mm I.D. to 57.15 mm O.D.

Key Features

- Narrow body 1.5in (38.1 mm) wide for beveling a single tube in a waterwall
- Three interchangeable motor choices, pneumatic, electric and battery
- Rugged steel housing for lasting durability
- Patented clamping system permits the clamps to release as easily as they tighten, no hammer needed!
- Permanently attached wrenches keep the operating essentials at the operator's finger tips
- Dual opposed ball bearing supported gear drive design
- Proprietary EscoLock blade holding system minimizes vibration and maximizes tube and pipe bevels per blade

Popular tube and pipe beveling applications

- Bevel, face and bore
- "J" prep for orbital welding
- Tube to tube sheet weld removal and tube sheet weld preparation
- Boiler tube membrane removal
- Boiler tube overlay and cladding removal
- Boiler tube waterwall single tube replacement
- Reface fin fan tube seat surfaces

Designed for limited access boiler tube beveling

The ESCO Ground MILLHOG® is a right angle I.D. clamping tube beveling tool that is only 1.5in (38.1mm) wide and fits between boiler waterwall tubes for beveling a single tube and other boiler tube applications with restricted access. The tool is made of heat treated steel for durability and proprietary bearings support heavy duty gears for smooth operation and long durability on the toughest boiler applications.

The patented pull-push clamp and release system with permanently attached wrenches and clamps eliminate the possibility of loose parts falling down the tubes. This high performance tool utilizes the EscoLock wedge style blade lock system and TiN coated blades for chatter-free beveling.

Power choices include pneumatic, electric and battery. All motors are easy to switch and deliver optimum torque and speed that reduces bevel time by pulling a thick chip on the toughest boiler tube alloys, without cutting fluids.

Pneumatic Standard

Works well on all tube and pipe alloys including stainless steel.

Pneumatic Air Clamp

Quickly clamps and releases, reduces cycle between bevels.

Electric

Reliable plug in power, high torque and low rpm. Superior performance on all alloys including membrane and overlay removal.

Battery

Excellent for beveling all alloys including overlay and membrane removal. Best of all it's hose and cord free.

Only 1.5" wide for single boiler tube beveling

The air clamp increases production and minimizes operator fatigue

Remove membrane from between tubes

Remove membrane and overlay/cladding from between tubes

1.187	MO-103	GB-103	MRB-8	4
1.250	MO-104	GB-102	MRB-8	4

Membrane removal heads fit over the tube O.D. and remove the membrane from between boiler waterwall tubes while not derogating the tube O.D.

Both Membrane and Membrane/Overlay heads are mounted to a Base Head that can also hold a bevel blade.

Membrane/Overlay Heads remove membrane from between tubes and also weld overlay from the tube O.D.

The ESCO patented Membrane and Overlay Removal Heads use round inserts with a tapered shank that install with a tap from a hammer. They easily remove and rotate for extended use.

Ground Overlay Removal Heads
