

10" Adjustable Counterbore Attachment Kit

The versatility of your Clamshell Portable Lathe is greatly expanded with this tool kit.

The 10 inch Adjustable Counterbore Attachment provides a wide range of facing and machining capabilities not found in a single attachment tool.

The kit includes all you need for flange facing, counterboring, RTJ machining, and many other flange and bore machining operations.

Operation:

The Clamshell Lathe drive moves the tool across the machining face, and the manual feed moves the tool toward the face.

Preset angle tool positions allow for quick-setup RTJ and face feature machining.

Benefits

- Flange Facing
- Beveling
- Ring Joint Machining
- Counterbore | Deep Counterbore
- Tapered Boring
- O-Ring Groove Machining
- Valve Seat Machining
