

Portable 3 Axis Gantry Milling Machine

A Portable Solution for On-Site Milling Requirements

Mactech Europe's Portable 3 Axis Gantry Milling Machine offers a cost effective solution for your on-site milling problems.

The Portable 3 Axis Gantry Milling Machine is versatile and adaptable with many different configurations possible.

The portable machine can be clamped or bolted to the workpiece or welded to sacrificial plates for mounting in any orientation.

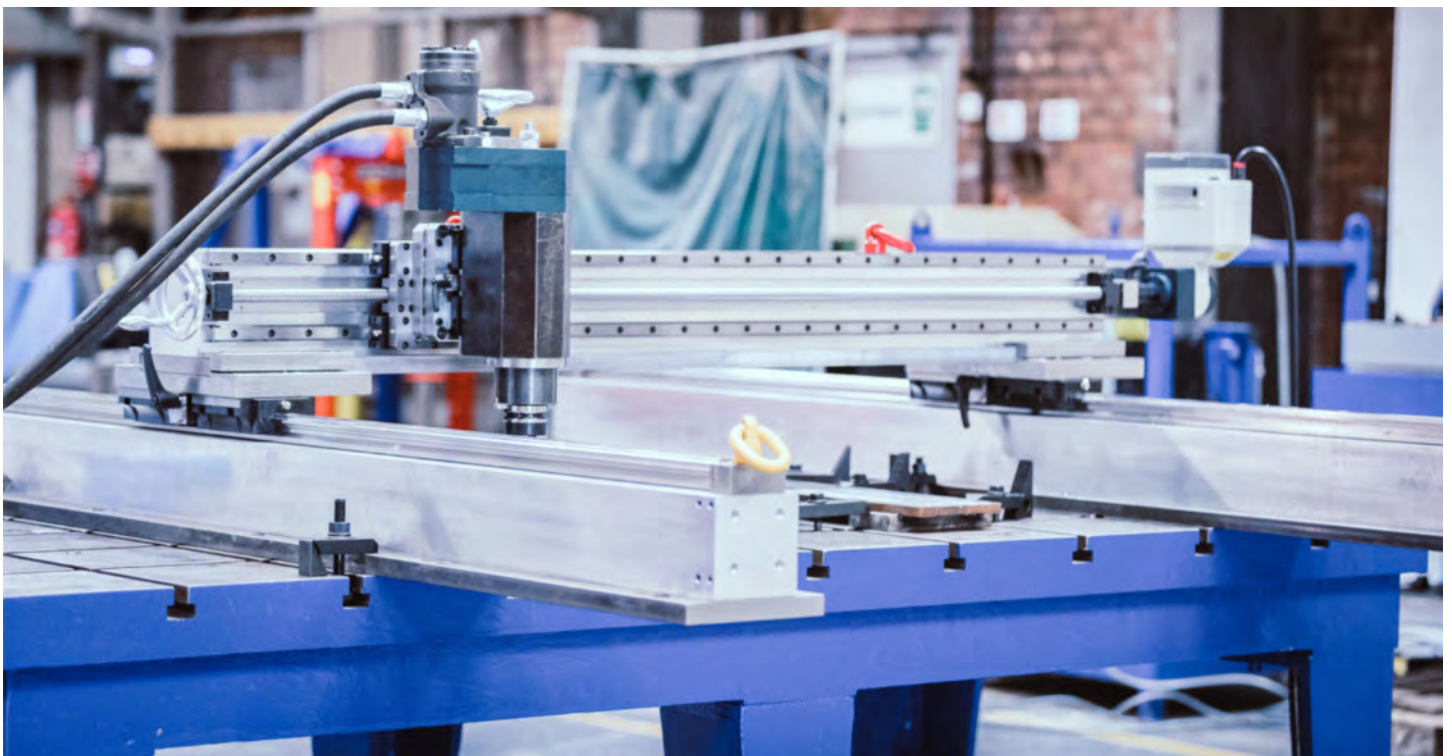

The long travel beams can be positioned at any point along the cross travel beam so that the milling head can be inboard or outboard of the long travel beams.

The 3 Axis Gantry Milling Machine can machine steel and steel alloys, stainless steel, aluminium, copper-nickel, nickel-copper-iron, and bronze.

Please speak to us if you require further information regarding optimal feed speeds and spindle speeds for different materials and cut depths.

The milling head itself can be rotated through 90° increments.

The Mactech 3-axis gantry milling machine is supplied with either a hydraulic, pneumatic, or electric spindle motor.
