

MBMC4 Portable Boring Bar

The MBMC4 Portable Boring System is a proven, reliable and affordable solution to your on-site machining needs.

MBMC4 Portable Boring System is Mactech's premier system for on-site machining, where accuracy and portability are of utmost importance.

The MBMC4 can cut in any position, at any angle.

The feed mechanism allows machining along the full length of the boring bar, and stack able boring heads reach to your largest diameters.

Setup is quick and easy even in the most challenging environments.

The MBMC4 Portable Boring System is a proven, reliable and affordable solution to your on-site machining needs

On-site rudder tube machining with MBMC4 Boring System positioned vertically
