

MBMC6 Portable Boring Bar

The MBMC6 Facing Arm Attachment used as an accessory to the MBMC Boring Bar system

The Facing Arm Attachment allows the MBMC6 Boring Bar to be used as a flange facing machine capable of machining flanges from 6 inches to 76 inches (152 to 1930 mm) diameter.

Features include modular extension sets and automatic variable feed. Inward and outward radial feed capability allows flexibility in cutting direction.

The MBMC 6 Facing Arm Attachment is well-balanced for top performance and is easy and fast to install
